6750 E Chenango Ave Apt 350
Denver CO, 80237

Professional Summary

Quantitative risk analyst with experience developing credit risk models, analyzing loan portfolio performance, supporting asset/liability risk analysis within a financial institution. Skilled in SQL, Python, and statistical modeling, with hands-on experience in regression modeling, roll rate analysis, and large-scale data pipelines.

Professional Experience

BI Analyst

Partner Colorado Credit Union
January 2025 - Present

- Developed logistic regression models to predict delinquency worsening
- Generated probability-based risk scores and evaluated using AUC
- Built roll rate and transition models to analyze and forecast credit risk migration
- Queried and transformed large loan datasets using SQL
- Built reusable datasets for modeling and reporting
- Supported ALCO reporting (loan yields, balance sheet mix, interest rate exposure)
- Delivered risk insights to support portfolio monitoring and decision-making

Licensed Banker

US Bank Corp.
Feb 2024 - Jan 2025

Evaluated client financial profiles and calculated debt-to-income ratios to support lending decisions. Originated loan products in alignment with underwriting standards and regulatory guidelines.

Branch Manager

Currency Exchange International
May 2021 -Feb 2024

Managed branch operations, including cash controls and high-volume transactions, while ensuring full compliance with BSA/AML regulations, including OFAC, CTRs, and SARs.

Senior Retirement Advisor

TIAA
May 2016 - Dec 2019

Advised clients on retirement planning and financial products, leveraging Series 6 licensure to guide investment and income strategies.

Education

M.S. in Business Analytics

University of Colorado Denver
Graduation Expected:
December 2026

Focused on predictive modeling, machine learning, and statistical analysis. Developed applied analytics projects including a custom AI chatbot and predictive models, with coursework in optimization, forecasting, and data-driven decision-making.

B.S. in Computer Science

Colorado State University Global
Graduated February 2025

Strong foundation in data structures, algorithms, and software engineering, with experience building data-driven applications and working across SQL, Python, Java, JavaScript, React, and Bash.

Skills

Programming: Python (pandas, sklearn), SQL, R, Julia

Modeling: Logistic Regression, Roll Rate Analysis, Monte Carlo Simulation

Risk & Finance: Credit Risk, ALCO, Interest Rate Exposure, Delinquency

Analysis Tools: Power BI, Excel, Git, Jupyter
